

# Digital Literacy PORTFOLIO

## 1. Presentation

This project is a comprehensive Digital Literacy Portfolio developed as part of my role as a Student Digital Ambassador. The aim of this portfolio is to help students build essential digital skills required for academic, professional, and personal growth in today's technology-driven world.

The portfolio covers key areas such as online identity creation, digital communication, cyber safety, responsible social media use, and basic digital tools. It provides practical guidance on creating professional profiles on platforms like LinkedIn and GitHub, along with tips for maintaining a positive digital footprint.

Additionally, this project highlights the importance of digital ethics and responsibility, including topics like privacy protection, cyberbullying awareness, and safe online behavior. Real-life scenarios and examples are included to demonstrate the difference between appropriate and inappropriate digital conduct.

Through this portfolio, I aim to empower my peers to become confident, responsible, and ethical digital citizens.

# 2. Portfolio

In this task, I created my LinkedIn and GitHub profiles and learned the importance of maintaining a professional online presence. I improved my ability to present my skills and understood how digital profiles can impact career opportunities. This task helped me become more confident and aware of my digital identity

# 3. Platforms

Digital platforms one should know to use are as follows:

In this task, I used tools like Google Docs, Excel, and Canva and learned their practical applications. It improved my digital skills, creativity, and productivity. This experience helped me understand the importance of digital platforms in academic and professional work.

# 4. EMAIL ETIQUETTES

## Email Etiquette Checklist

### 1. Clear Subject Line

Write a short and specific subject

Example: Leave Application for 2 Days

### 2. Proper Greeting

Use formal greetings like:

Dear Sir/Ma'am

Dear Professor [Name]

### 3. Clear and Concise Message

Start with purpose of email

Keep message short and to the point

Avoid unnecessary details

### 4. Professional Language

Use polite and respectful tone

Avoid slang, emojis, or informal words

### 5. Correct Grammar & Spelling

Check for mistakes before sending

Use proper sentence structure

### 6. Mention Attachments (if any)

Clearly refer to attached files

Example: Please find the attached document

### 7. Polite Closing

Use formal closing lines like:

Thank you

Regards

Sincerely

### 8. Proper Signature

Include your name

Add details like course/college if needed

### 9. Timely Response

Reply to emails within a reasonable time

Don't ignore important emails

### 10. Review Before Sending

Read the email once again

Check tone, clarity, and attachments

Sample email :

# 5. Cyber crime

## Case study: Phishing Attack

**Introduction** : Cybercrime is increasing rapidly with the growth of the internet. One of the most common types is phishing, where attackers try to steal personal information by pretending to be a trusted source.

**What Happened** : A college student received an email that appeared to be from a bank. The email asked him to verify his account details urgently by clicking on a link.

Believing the email to be genuine, he clicked the link and entered his bank credentials, including his username, password, and OTP.

### Type of Cybercrime:

- Phishing Attack
- Identity Theft
- Financial Fraud

### Impact on Victim:

- Money was withdrawn from his bank account
- Personal data was compromised
- Mental stress and panic
- Loss of trust in online platforms

### Key Learning:

This case shows that not all emails or messages are genuine, even if they look official. Awareness is the best protection against cybercrime.

# Cybercrime Prevention Checklist

## Security Measures

## Use strong and unique passwords

## Enable two-factor authentication (2FA)

## Never share OTP or passwords

## Safe Internet Practices

## Do not click on unknown or suspicious links

## Always check the email sender's address

## Avoid downloading files from untrusted sources

# Awareness

## Be cautious of “urgent” or “too good to be true” messages

## Verify information from official websites

## Stay updated about common cyber threats

## Device Safety

## Install antivirus software

## Keep your system updated

## Log out from shared/public devices

THANK

YOU
